AUTHOR: Abrosimov, V. P.

TITLE: Process for multi-arc welding of continuously moving parts

PERIODICAL: Byulleten' izobreteniy, no. 14, 1962, 28 (Soviet patent, class 21h, 301, no. 148865  
(739710/24 July 24, 1961)

TEXT: A process is described for multi-arc welding of continuously moving parts, by several welding heads located along the seam. To make sure that the parts to be welded will move with a speed exceeding the welding velocity, the welding heads are moved according to a closed curve, whereby part of the curve coincides with the direction of seam; the heads are switched on during their displacement over the seam while the distance between the heads is selected so that the next head enters the welding zone, immediately after the previous head is leaving the said zone.
